

# Updated Referral Program (Expert Version)

## Referral Program Text

Referral Program – Invite friends and both earn \$0.10 for each valid referral!

## How It Works

- 1 Share your unique referral link with friends
- 2 They sign up using your link
- 3 They create at least 3 shortened links
- 4 Both you and your referral complete Social Verification by following our official social pages
- 5 Once verified and approved, both users earn \$0.10

*Referral rewards are credited only for valid and verified users. This helps us keep the platform free and sustainable.*

## Social Verification Task

Social Verification is implemented as a one-time task available on the Task page. Users must follow the official social media pages and submit screenshot proof.

- 1 Submit screenshot proof links using imgbb.com or postimages.org
- 2 Multiple proof links can be submitted, separated by commas
- 3 Task status: Pending, Approved, or Rejected

## Admin Panel – Social Verification Controls

The Admin Panel must include full control over Social Verification and referral rewards.

- 1 View submitted Social Verification tasks with screenshot proof links
- 2 Approve or reject Social Verification submissions manually
- 3 Prevent multiple approvals for the same user
- 4 Referral reward amount configurable from the admin panel (default \$0.10)
- 5 Rewards are credited only after both users are verified and approved

## Security & Anti-Abuse Rules

- 1 No referral reward without Social Verification approval
- 2 No duplicate payouts allowed
- 3 All referral reward transactions must be logged
